Exchange Programmes
Educational Institution «Gornostay»

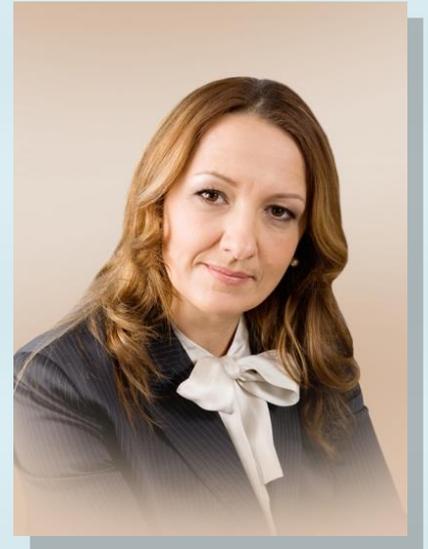

Putintseva Irina
Principal of the Educational Institution «Gornostay»

Dear friends!

Educational Institution «Gornostay» is one of the leading educational institutions in Novosibirsk - Siberia, providing full concept of global education.

We understand education as a perspective, which arises from the fact that contemporary people live and interact in an increasingly globalised world. For this, we define our mission as to give our students the opportunity and competences to share their own point of view within a global, interconnected society, as well as to understand and discuss complex relationships of common social, ecological, political and economic issues, so as to derive new ways of thinking and acting.

We understand that the education has to develop the ability to appreciate the value of freedom and ability to challenge. For us, this means to educate our students to resolve difficult and uncertain situations, to build attitude for autonomy and individual responsibility.

Teachers and parents agree with the basic vision of Education for Sustainable Development, it is a world where everyone has the opportunity to benefit from education and learn the values, behaviour and lifestyles required for a sustainable future. Provide an opportunity for promoting we could guaranty the transition to sustainable development – through all forms of education, public awareness and training. Thus to give an enhanced profile to the important role of education and learning in sustainable development.

So we define our exchange academic programs valuable for our students' future career, for managing cultural diversity, as well as respect common heritage and respect equal dignity of their individuality, based on dialogue and collaboration.

Development in education is a complex and far –reaching undertaking
By learning throughout our lives we equip ourselves to choose most advantageously
as the future unfolds.

«Global education is education that opens peoples' eyes and minds
to the realities of the globalized world.»

Kind regard,
Irina Putintseva

The major mission of our organization is to provide special educational program to bring up new generation of leaders in Russia and global world.

«Gornostay» is a pioneer in Projects

- Autonomy in management
- State public high school administration: Management Board – unit for developing school strategy
- Specialized classes: mathematics, physics, engineering, biochemistry, media
- Special foreign language programs
- International partnerships: Germany, France, Japan, China, Malta, USA, UK

Recent focus is characterized by innovative programme delivery in spheres of our particular strength. To develop the abilities of our students is a prior task of «Gornostay». The team of teachers and parents are interested in expanding the horizons of children's career. We create new forms of the process of education to provide high standards for our graduating students.

«Gornostay» presents best traditions of Akademgorodok, in education and research technologies in forming intellectual elite of Russia. Information provided by different programs for High School teachers, helped us to gain the idea of interaction of the private and nonprofit sector in solving social and civic problems. The opportunity to open dialogue with representatives of the administration, politicians and civic leaders is important and valuable. This allowed us to understand main ideas of management, organization of leisure and educational activities.

And above all, the idea of building up friendly and open relations based on friendship and openness help us to organize partnership relations in exchange programs, to study the life of local communities in different states and make new friends.

We are sure that our graduating students possess not only high levels of knowledge, but also would be able to solve problems and present their position in life, be active and charitable citizens. Thanks to exchange programs, we are able to organize the training and education process, create various forms of student activities, such as:

- Interactive forms of education
- Tutoring
- Self-education
- Social projects, Research Projects
- Cooperation with the International Schools
- Participation in international projects and programs
- Participation in the global education projects "EcoWorld"
- Language Environment playground «Think global, act local»
- Program «Citizen»
- Debate Club «I have the right»
- Program «Big Brothers and Big Sisters» - program for children with disabilities

Akademgorodok is a powerful scientific complex and beautiful spot in Novosibirsk. It's located in 40 kms from the largest city to the East of the country - Novosibirsk, in pine forest and birch groves, near the Ob sea. Here there are no industrial firms, and the main part of the territory is occupied by scientific research institutes and enclosed by woods. Novosibirsk Science Centre, the largest at the SB RAS, includes about one-half of the Siberian Branch resources. According to the Government's resolution of setting up the Siberian Branch of the USSR Academy of Sciences adopted in 1957, it was the first to be founded.

Akademgorodok was intended as the world-first comprehensive science centre. Here, according to the SB RAS founders' idea, research teams, competent in all major fields of fundamental science, were formed.

In view of its unique location, Akademgorodok provides an opportunity for students to study environment and to form their moral consciousness, based on love and respect for nature and bring their charity toward neighbours. We form moral standards through practical deeds of our students in being environmentally friendly and socially assistant. We are confident that the friendly environment begins with in our mind and soul.

Science is one of basic radiant of employment of the population in Novosibirsk Akademgorodok: more than 40 Research and Design and Technology Institutes of SB RAS (the Institute of Mathematics, the Institute of Computational Mathematics and Mathematical Geophysics (Computing Centre), Institute of Informatics Systems and Design and Technology Institute of Data Processing Equipment, Institute of Nuclear Physics, the Institute of Laser Physics, the United Institute of Semiconductor Physics)

Tehnopark-Akademgorodok - the project that ensures the development of high-tech sectors of the economy, launching the region's economic growth. The local goal is to create at least 20 successful innovative businesses per year.

Now Academpark is a comprehensive technology park with a unique technological and business infrastructure, which allows creating the best conditions for the generation and development of innovative companies and the successful development of existing high-tech enterprises.

As part of environmental education we organized the program with schools in Germany: Hamburg, Magdeburg and Hildesheim, apart from the cooperation with Germany, we build relationships with other countries - European and Asian: GB, France, Malta, Slovenia, China, and Japan. Thanks to our colleagues from the International School QSI there was a partner program with Hillcrest Christian School Mississippi USA. We do not only invite guests, as host families, we help to understand Russian culture through interaction with peers. These programmes allow us to expand the boundaries in language and realize our opportunities.

Being aware of the relationship with the environment, establishing contacts with partners from different countries - *we learn to create peace on Earth.*
